

WORKING WITH JOHNSON & JOHNSON
CAN CHANGE EVERYTHING, INCLUDING

__work

We focus on change. We use innovation to prevent, treat, cure and stop diseases. Developing a vaccine for HIV, refrigerated drones that deliver medicines to places that are hard to reach or robots that operate, everything we do should have a positive impact on people's lives, nearby and worldwide.

__live

We take care of our people. We give them the chance to discover, engage, live life to the fullest. We hand you the tools to customize your work life to your own lifestyle. With enough fun and challenges at work but also enough time for you.

__grow

As a young professional, you want to grow. We want you to grow. We offer an international context, filled with opportunities and programs to broaden your knowhow and experience, in-depth or beyond.

Apprentice Manufacturing Technician

Johnson & Johnson Vision Care, Limerick

Johnson & Johnson Vision Care is committed to improving and restoring sight for patients worldwide. We marvel at the magic of our eyes, yet we are acutely aware there are many who do not fully experience the wonder of this gift. Nearly 285m people around the world face impaired vision, and 80pc of those cases are preventable with early diagnosis and treatment. We are committed to changing these statistics.

Johnson & Johnson Vision Care was established in Limerick in 1995. Our site uses the most advanced technology in the industry and we now employ over 1000 people to produce ACUVUE, the world's best-selling contact lens.

Using our highly automated production process, we produce daily disposable contact lenses while utilizing state of the art technologies such as injection moulding, robotics, vision systems and sterilisation systems.

Each year, we have increased output because of the increase demand for our Acuvue lenses throughout the world. Continued expansion of our product lines and extensive engineering and retrofit projects ensure that this growth is sustained well into the future.
